PROFIL

I'm a French front-end developer based in Lisbon. I create modern and optimized user interfaces using technologies such as Next.js and Vue.js, I'm used to communicating with back-end and design teams through agile projects. I'm looking to join a team that follows best code practices and where I can communicate and be challenged.

PROFESSIONAL EXPERIENCES

○ FRONT-END DEVELOPER | THENEWSROOM

2023 - 2024 | Lisbon, Portugal

- Designed and developed a simplified ad-serving platform for newsletters and tools aimed at journalists.
- Created a daily newsletter generated by artificial intelligence to combat misinformation, featuring five curated articles with images and verified sources.
- Developed internal tools to help journalists aggregate and select reliable articles, facilitating research and ensuring accuracy.
- Used Gatsby, NextJS, TypeScript, Supabase, and Material-UI for efficient project delivery and innovation.

○ FRONT-END DEVELOPER | BWEZ

2022 - 2023 | Paris, France

- Developed projects for clients like Armani and Hennessy, using VueJS for front-end development and implementing an internal API.
- Gained hardware skills by integrating connected LEDs and interactive screens.
- Designed and developed applications from scratch following SCRUM methodologies, using technologies such as Apollo Client, NextJS, GraphQL, NodeJS, PostgreSQL, and Docker.

○ FULL STACK DEVELOPER | WILD CODE SCHOOL

2021 - 2023 | Paris, France

- Developed a single-page application with ReactJS and a MySQL database.
- Presented the project through a simulated real-life scenario.
- Gained advanced skills in back-end development using Express and MySQL, with a solid understanding of Git/GitHub.
